

Moises Sanabria

FORWARD-DEPLOYED AI ENGINEER | FULL-STACK BUILDER | TECHNICAL FACILITATOR

Miami Beach, FL | U.S. Citizen | (954) 588-4680 | m@moises.tech | moises.tech | linkedin.com/in/moisesdsanabria | github.com/moisesstech

Full-stack engineer and technical facilitator who turns ambiguous AI opportunities into working, reviewable systems. Experience spans founding-engineer product delivery, client-facing solutions engineering, enterprise data integration, and hands-on AI education. Strongest in rapid prototyping, agentic/RAG workflows, stakeholder translation, and moving early concepts toward reliable production use.

CORE CAPABILITIES

AI SYSTEMS	Agentic workflows, RAG, human-in-the-loop review, structured outputs, prompt/evaluation patterns
ENGINEERING	TypeScript, React, Next.js, Node.js, Python, SQL, APIs, GraphQL, Supabase, pgvector
DELIVERY	Rapid prototyping, client discovery, workshop facilitation, workstream leadership, documentation
OPERATIONS	AWS, Docker, Git, CI/CD practices, logging, versioning, data pipelines, production support
AI TOOLING	OpenAI, Anthropic, Cursor, Claude Code, GitHub Copilot, Replicate, Gemini familiarity

EXPERIENCE

Oolite Arts | Technical Director of Digital

Sep 2025 - Present
Miami, FL

- Own public-facing digital infrastructure, lab operations, equipment readiness, and booking/signage systems supporting daily artist access.
- Designed and delivered 18 hands-on workshops translating AI, agentic tools, media systems, and digital workflows for mixed-skill audiences.
- Lead vendor coordination, fabrication workflows, operational troubleshooting, and grant documentation across technical programs.

Lore Machine | Founding Engineer / Chief Prompt Officer

Jun 2023 - 2025
Miami, FL

- One of three founding engineers; owned the frontend application, authentication, and AI/data API integrations for a real-time generative storytelling platform.
- Moved the product from early prototype to a production Vercel deployment while coordinating contractors, sprint timelines, and executive reporting.
- Served as the primary translator across engineering, product, business, and marketing; converted ambiguous creative and commercial goals into shippable technical work.

Playwire | Data Analyst / Solutions Engineer

Jan 2021 - Dec 2022
Boca Raton / Miami, FL

- Partnered with business development and client technical teams to scope, implement, and troubleshoot publisher integrations into a SaaS platform.
- Migrated Kinesis/Athena data into Snowflake and built Tableau tooling for advertising-auction performance and algorithm evaluation.
- Created Slack-integrated alerting for faster detection of data consistency issues and used deep JavaScript/Chrome DevTools fluency to resolve client-side failures.

SELECTED APPLIED-AI EVIDENCE

Agentic Evidence Pipeline

TypeScript, connectors, contracts, evaluation - A connector-driven evidence ingestion system with normalized records, contract tests, observability hooks, and repeatable demo-to-production hardening patterns.

Institutional Memory Agent - Infra24

TypeScript, Supabase pgvector, OpenAI - Retrieval-augmented Q&A; for cultural institutions using hybrid retrieval, grounding guards, a golden-set evaluation script, and governed human-approved public outputs.

CRM Network Readiness Agent - Infra24

Airtable, rules, human approval - Scores CRM records and proposes next actions through a human-in-the-loop Airtable queue, keeping outreach decisions reviewable before execution.

Moises Sanabria

FORWARD-DEPLOYED AI ENGINEER | FULL-STACK BUILDER | TECHNICAL FACILITATOR

Miami Beach, FL | U.S. Citizen | (954) 588-4680 | m@moises.tech | moises.tech | linkedin.com/in/moisesdsanabria | github.com/moisesestech

FORWARD-DEPLOYED DELIVERY PATTERN

DISCOVER	Frame ambiguous stakeholder needs as a bounded problem, success criteria, prototype scope, and delivery sequence.
BUILD	Move quickly across interface, API, data, and AI layers to produce working software instead of presentation-only concepts.
HARDEN	Add grounded retrieval, validation contracts, logging, evaluation, documentation, and human approval where risk requires it.
ENABLE	Translate technical systems into workshops, operating procedures, reusable examples, and handoffs that mixed audiences can use.

ADDITIONAL ENGINEERING & DIGITAL PRODUCTION

Eden Art | Senior Front End Engineer

Jan 2023 - May 2023
Remote

- Built a responsive Web3 DApp for multimodal AI image generation using React, routing, Hooks, Context, Lazy/Suspense, and Styled Components.

Institute of Contemporary Art, Miami | Digital Producer

Oct 2019 - Dec 2020
Miami, FL

- Managed vendors delivering interactive HTML5 video, WordPress systems, GitHub workflows, GraphQL integrations, and AWS CloudFront.
- Integrated Salesforce collection data with web/ticketing infrastructure and supported international live programming through AI-assisted subtitling and streaming.

Moises.Tech | Independent Creative Technologist

Apr 2014 - 2019
New York, NY

- Delivered applied research and prototypes spanning StyleGAN/PyTorch, Docker, mobile XR, React Native, and live audio-reactive VR for cultural and startup clients.

EDUCATION

The Cooper Union for the Advancement of Science and Art | Bachelor of Fine Arts

2011 - 2015
New York, NY

Interdisciplinary education within Cooper Union's shared Art, Architecture, and Engineering environment.

METHODS & PROFESSIONAL PRACTICE

DELIVERY	Client discovery; rapid prototyping; agile workstreams; cross-functional collaboration; vendor and stakeholder coordination; technical handoff.
QUALITY	Testing and contract checks; observable workflows; versioned documentation; human-in-the-loop review; accessibility and operational readiness.
COMMUNICATION	Technical facilitation; mixed-audience instruction; executive translation; clear written artifacts; reusable prompts, examples, and runbooks.
